

MAYOR AND COUNCIL AGENDA

NO. 6

DEPT.: Community Planning and Development Services DATE PREPARED: 3/11/05
STAFF CONTACT: Jim Wasilak FOR MEETING OF: March 21, 2005

SUBJECT: Discussion and Instructions to Staff on Map Amendment application MAP2004-00091: Sectional Map Amendment to Amend the Zoning Map per Recommendations in the Town Center Master Plan; Mayor and Council of Rockville, applicants.

RECOMMENDATION: Staff recommends that the Mayor and Council provide directions to staff for the preparation of the Ordinance to adopt the Map Amendment.

DISCUSSION: This application is a Sectional Map Amendment that is intended to rezone portions of the Town Center Planning Area based on the recommendations in the Town Center Master Plan. The Map Amendment would accomplish the following:

- renaming the Town Center zones from TCO-1, TCO-2, TCM-1 and TCM-2 to TC-1, TC-2, TC-3 and TC-4 respectively;
- rezoning 10.42 acres, generally along the west side of North Washington Street and Hungerford Drive between Martins Lane and Ivy League Lane, from the C-2 to TC-1 Zone;
- rezoning the west side of the Rockville Metro station from the TCO-2 Zone to the TC-4 Zone;
- rezoning property located on the south side of Fleet Street, between Maryland Avenue and Monroe Street, from the R-90 (One Family Detached, Restricted Residential) to the R-30 (Multiple Family, Low Density Residential) Zone
- rezoning portions of the Jerusalem Mt. Pleasant Church property on Wood Lane from the R-60 and TCO-1 zones to the O-2 Zone in order to remove the condition that church property is within three zones.
- Rezoning the property known as the Anderson House, at 39 West Montgomery Avenue, from the O-2 to the C-T (Commercial Transition) zone;
- Rezoning of the Christ Episcopal Church rectory property at 107 South Washington Street from the C-T zone to the R-90 Zone.

The Mayor and Council held a public hearing on this application on January 10, 2005, and heard from a total of twelve speakers. Eight speakers spoke in opposition to the rezoning of the Fleet Street properties. Nearby residents are concerned about the loss of green space, the continuation of the buffer between the property and the Courthouse Walk community, the potential for multifamily development on the site, among other issues (see attached summary). Other speakers represented the Bealls Grant Apartments and the 1 and 21 Church Street properties.

Options Considered: For the Fleet Street properties, the options are to not rezone and leave them in the R-90 Zone, or rezone to R-30 as recommended in the Town Center Master Plan. If the property remains R-90, it could redevelop as single family homes or permitted institutional uses, or the RTH procedure could be employed for townhouse development. Under the R-30 Zone, townhouse development is permitted, as well as low-density multifamily development. Staff

recommends rezoning to R-30 but with a limitation to townhouse development.

For the 39 West Montgomery Avenue property, the applicant has suggested that a split zone between C-T and O-2 may be appropriate. Options include rezoning the entire property to C-T, which would essentially preclude any further development on this large property, or retaining the O-2 Zone. The former residence clearly meets the intent of the C-T Zone, and staff therefore recommends that the property be included for rezoning to C-T with the remainder of the property remaining O-2.

The Bealls Grant Apartments on North Washington Street are split-zoned between the TCO-1 and R-20 Zones. The property is primarily TCO-1 with a strip of R-20 along the rear property line. There does not appear to be a compelling reason to retain this, and including the single lot into one zone would aid any future redevelopment.

The Mayor and Council received a letter from representatives of the 1 Church Street and 21 Church Street properties (See Attachment 1), advocating that the 1 Church Street property should be allowed to be rebuilt to its current density if the properties are not rezoned to either TC-3 or TC-4 from the current TCO-2. The FAR of 1 Church Street is 3.0, while the maximum FAR of the current and recommended zone is 2.0, rendering the building a development nonconformity with respect to FAR. Staff recommends that the FAR of 3.0 be grandfathered for 1 Church Street, as is the height of 110 feet. Rezoning the properties to either TC-3 or TC-4 would permit additional density that may not be appropriate in this location.

Fiscal Impact: N/A

Change in Law or Policy: Adopting the Map Amendment will implement the recommendations contained in the Town Center Master Plan.

Boards and Commissions Review: The Planning Commission reviewed this application on November 3, 2004 and recommended approval of the application as submitted. The Commission's recommendation is included as Attachment 2.

Next Steps: Prepare an ordinance for approval of the Map Amendment application.

Exhibit # December 3, 2004

Hon. Larry Giammo and
Members of the City Council
The City of Rockville
111 Maryland Avenue
Rockville, Maryland 20850

Subject: MAP91

Public Hearing Date: 1/10/05

**RE: Zoning Text Amendment and Modifications to Sectional Map Amendment
for Town Center pertaining to commercial properties on Church Street**

Dear Mayor Giammo and Members of the City Council:

This office represents One Church Street, LLC and Church Street, LLC in connection with their properties located on the south side of Church Street adjacent to the Rockville Metro Station.

The property at One Church Street is improved by a 94,096 square foot, nine-story office building at the intersection of Church Street and Rockville Pike (See Exhibit 1). The property at 21 Church Street has received use permit approval for a 93,450 square foot, six-story office building facing the entrance to the Rockville Metro Station (See Exhibit 2).

The Town Center Master plan and the proposed Sectional Map Amendment recommends that these two properties be placed in the new TC-2 zone. We respectfully request that the map amendment be modified to place each of these two properties in the TC-4 or TC-3 zones. Such a zoning designation is more appropriate than the TC-2 zone classification because of: (i) the properties' immediate proximity to the Rockville Metro Station; (ii) the higher zoning densities allotted to neighboring properties; and (iii) the current improvements and approved use permits for the two properties.

- The Town Center Master Plan recently confirmed the common sense planning principle that higher development densities should be concentrated in the areas best served by mass transit facilities. This principle was followed with the zoning recommendations in the Master Plan and the proposed Sectional Map Amendment when they confirmed the 4.0 FAR allocations of the new TC-4 zone for those properties closest to Metro located across MD Route 355. Proximity to mass transit was also the reason both the Master Plan and the Sectional Map Amendment

LYNOTT, LYNOTT & PARSONS, P. A.

Hon. Larry Giammo and
Members of the City Council
December 3, 2004
Page 2

recommended changing the zoning and increasing the density allocations for the Metro site itself (from TCO-2 to TC-4) and for the Metro parking lots located on the other side of the train tracks (from I-1 to TC-3).

Except for the Metro Station itself, each of our client's properties stand in closer proximity to the Metro than any of the TC-4 properties in the Town Center. Indeed, even a cursory review of the proposed zoning map reveals an anomalous and unjustified situation whereby our clients' TC-2 parcels are surrounded with more densely zoned land on three sides, notwithstanding its immediate proximity to the Metro, MD Route 355 and the Town Center.

- For the same reasons noted above, both Church Street properties should at least be included among those parcels designated as TC-3. This designation would be consistent with the proposed upzoning of the Metro parking lot sites immediately to the east and north of our sites from I-1 to TC-3. It is noteworthy that the City has recommended placing these properties in the TC-3 zone notwithstanding: (i) that these parcels are located on the other side of the railroad tracks from all the other TC-3 and TC-4 parcels in the Town Center; and (ii) the proximity of the Metro parking lots to the homes of the East Rockville neighborhood. It is also noteworthy that in recommending the TC-3 designation for the Metro parking lots (thereby increasing their FAR from 0.75 to 3.0), the City recommended the institution of a "Residential Proximity Slope" due to these parking lots' proximity to East Rockville residences. Because our clients' properties are located on the west side of the railroad tracks, however, this concern about proximity to East Rockville's neighborhood does not exist. Indeed, our clients' properties are only surrounded by other TC-4 and TC-3 properties on three sides and a railroad track and institutional uses on its remaining side.

Moreover, when the nine-story office building located at One Church Street was constructed back in the late 1980's, the FAR allocated to this property was 3.0. By designating this property as TC-3, the City would logically be restoring the same density allocation to this property under which it was appropriately zoned at the time of its development.

- Lastly, if these properties were not placed in the new TC-3 or the TC-4 zones, the relatively new office building at One Church Street would be rendered a development non-conformity – meaning that it could not be rebuilt to its current density in the event it was substantially damaged by fire or other casualty. Such status would obviously have a substantially adverse impact on the property from an operational standpoint and from the standpoint of obtaining financing. This inequitable situation not only creates an unjustified hardship, it is a hardship that is rendered moot if the land was appropriately designated as TC-3 or TC-4.

LYNOTT, LYNOTT & PARSONS, P. A.

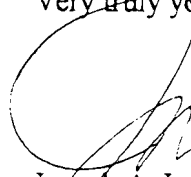

Hon. Larry Giammo and
Members of the City Council
December 3, 2004
Page 3

It should be noted that page 89 of the Town Center Master Plan includes a recommendation that would grandfather in the 110' height limitation for buildings in the TC-2 zone built prior to July 1, 2001. Unfortunately this language is not sufficient to solve the development non-conformity status of the building at One Church Street because the existing building would still significantly exceed the 2.0 FAR allocation of the TC-2 zone. To prevent such an undue hardship and in the event that the properties are not placed in the TC-3 or the TC-4 zones, at the very least, the zoning ordinance must include an affirmative notation that existing buildings in the TC-2 zone should be allowed to be rebuilt to their current density in the event of fire or other casualty. This provision is consistent with other sections of the zoning ordinance pertaining to development non-conformities. (See e.g., Section 25-324 pertaining to the RPC zone). Specifically, the property owners request that in the event the properties are not placed in the TC-3 or TC-4 zones, that the ordinance include an affirmative notation as follows:

Any development which lawfully existed prior to the rezoning of the land on which it is located to the TC-2 zone, shall be regarded as a development non-conformity, but if damaged, can be rebuilt, repaired and/or reconstructed only to the extent of the original development existing on the date of damage.

Thank you for this opportunity to comment on the proposed Sectional Map Amendment.

Very truly yours,

Joseph A. Lynott, III

Dear Mayor and Council Members,

As a long time citizen of Rockville and owner of the property at 100 S. Adams Street, I am writing to request that this property may be consider to include in Map Amendment for rezoning this property from R-90 to C-2 Zone.

This House has not been used appropriately as residential home. Because of traffic noise and shake when heavy truck pass by.

The change to office use would not change the physical appearance of the house and parking lot. But it would help to make this property in good use.

I appreciate your assistant on my Request. If need additional information or questions, please contact me at 301-294-1393.

Sincerely, yours,

George S.H. Chang

RE: Zoning Map Amendment Application MAP 2004-00091
107 South Washington Street
(Christ Episcopal Church Rectory)

Dear Mayor Giammo and Members of the City Council:

On behalf of our client, the Vestry of Prince George's Parish, the title owner of the property more commonly known as the Christ Episcopal Church rectory located at 107 South Washington Street, we request that the City Council rezone this property from the C-T to the R-90 classification as proposed in Zoning Map Amendment Application MAP 2004-00091. Such Council action will:

1. Place the rectory property in the same zoning classification (R-90) as the adjacent Christ Episcopal Church land.
2. When the Church and rectory properties are replatted (as part of implementation of a recent special exception for a private educational institution granted to Christ Episcopal), create a lot with no distinction in zoning between the rectory and church.
3. Eliminate any restrictions in operation of Christ Episcopal School (due to the fact that a small portion of the existing church building in which the School operates extends into the current C-T zoned area, a zone which does not allow private educational institutions by special exception).

Thank you for your interest and attention to this request.

Sincerely yours,

MILLER, MILLER & CANBY

Re: Split Zoning of Lot at 254 North Washington Street
Beall's Grant Apartments
Lot 4, Block A, "City Center"
Map Amendment MAP 2004-00091
Public Hearing Date: Jan 10, 2005

Dear Mayor Giammo and Council Members,

This letter is submitted to request on behalf of MHP Town Center, Inc., to request that the portion of the above-referenced property which is classified in the R-20 Zone be reclassified to the TC-1 Zone (to be the "TC-1" zone pursuant to the Text Amendment Application TXT 2004-00215) as part of your consideration of Map Amendment Application MAP2004-00091. MHP Town Center, Inc., is a subsidiary of Montgomery Housing Partnership, Inc., and was established to own and operate Beall's Grant Apartments. It has owned and operated Beall's Grant Apartments since 1993 when it purchased it from the Resolution Trust Company and redeveloped the property with assistance from the City into affordable housing to serve the Rockville community. Indeed, by Resolution No. 01-93, adopted by the Mayor and Council at its meeting of January 11, 1993, the City endorsed the proposal of MHP Town Center, Inc., for development of mixed income housing on the property with financing from the Department of Housing and Community Development of the State of Maryland.

The single lot that defines the Beall's Grant property is divided into two zoning categories. The eastern two-thirds of the lot is zoned TCO-1 and falls inside the Town Center Performance District. The western one-third of the lot is zoned R-20 and falls outside the Town Center Performance District. This R-20 zoning on the Beall's Grant site is a long, narrow rectangle that descends from the large block of R-20 zoning that contains the Heritage Apartments adjacent to the northwest corner of the Beall's Grant property. On the Beall's Grant lot, most of the western side of this narrow rectangle of R-20 zoning abuts property zoned O-2 on North Adams Street, as can be seen on the attached zoning map.

Initially we met with James Wasilak, Chief of Long Range Planning, to discuss the issue. He stated that in general the City of Rockville views split zoning of a single lot to be undesirable. Upon initial review of the situation, he could see no reason for the split zoning and encouraged us to present a request to the Mayor and City Council to consider a single zoning classification for the property as part of the Sectional Map Amendment process.

After an additional meeting with Robert Spalding, James Wasilak and Edward Duffy, of the Community Planning Department, we request that the entire lot be placed within the Town Center Performance District and be zoned TC-1. This would provide uniformity to the Town Center plan and provide a continuous swath of TC-1 zoning along North Washington Street from Beall Avenue north to Martin's Lane. And, the TC-1 zoning would provide for more comprehensive development of the site. Attached are an aerial photograph of the area, a plat of property bounds and a zoning map that shows the split zoning of the site. Please let us know if we can supply any additional information on this issue.

In addition, we would like to point out that development of affordable housing involves some unique development characteristics. One of those characteristics is the fact that affordable housing does not require the same magnitude of off-street parking spaces as are found with other housing, particularly multi-family dwellings. Also, off-street parking requires substantial land area and/or expensive structured parking. As a result, at the appropriate time, we encourage the city to consider a text amendment to the City's parking standards to address this unique situation. Similarly, utilization of the optional method of development could enhance the opportunity for the provision of affordable housing. We understand that the City may review its Code provisions for the optional method of development in the near future and a text amendment to address this matter should be considered.

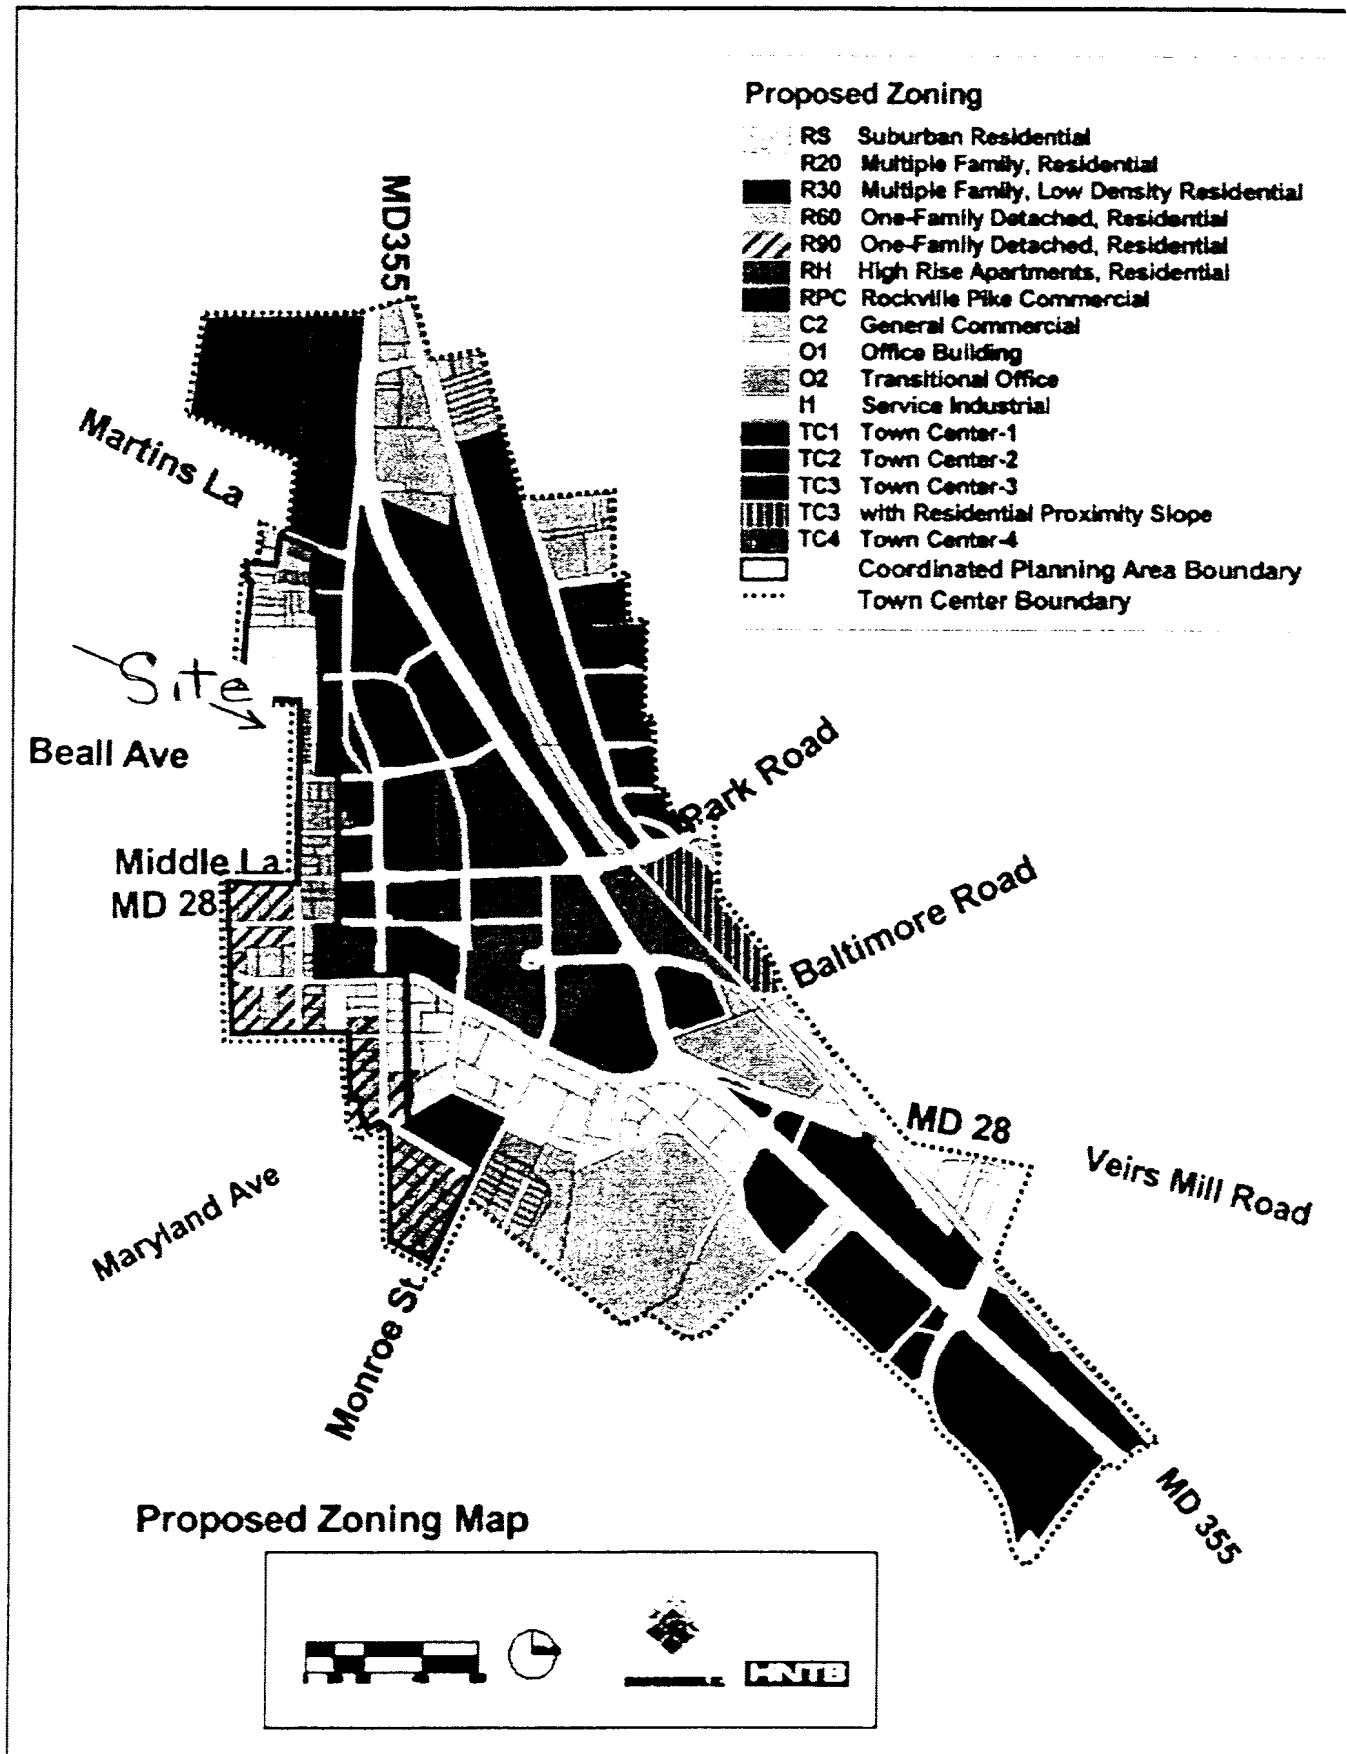

We look forward to working closely with the City of Rockville to develop and maintain quality affordable housing for the overall community.

Sincerely,

Robert Goldman
Vice President

City of Rockville

MEMORANDUM

November 22, 2004

TO: Mayor and Council

FROM: Planning Commission - Members Present: Commissioners Britton, Hilton, Johnson, Mullican, Ostell and Wiener

SUBJECT: Map Amendment Application MAP2004-00091, Mayor and Council of Rockville

The Planning Commission considered this application at its November 3, 2004 meeting. The application is a sectional Map Amendment that will confirm the zoning on most property in the Town Center Planning Area, while rezoning certain properties per recommendations in the Town Center Master Plan, Comprehensive Master Plan and the compatibility text amendment.

Commissioner Hilton asked what the recommendation in the Master Plan had been regarding the properties on South Washington Street whose owners had testified during the Master Plan process. Staff responded that the recommendation was to review any changes in zoning in that vicinity as part of a Neighborhood Plan for the West End neighborhood. Commissioner Metzger asked when that plan would begin, and staff responded that it would probably commence within the next one and one-half years.

Commissioner Hilton asked about the enclave of property that is in the County along Darnestown Road (properties on Dav and Hiwood Roads). Staff confirmed that this property is not a true enclave because it is connected to property in the County by the Darnestown Road right-of-way. This is unlike the two properties on Hectic Hill Lane that are entirely surrounded by property within the City and, therefore, are truly an enclave.

Commissioner Mullican stressed that the new zoning maps should be clearly readable, including the labeling of all streets on each sheet. Staff responded that, with the transition of the zoning map to GIS, there are still some items to clarify, including shading patterns.

Commissioner Ostell asked whether the rezoning of the Fleet Street properties was satisfactory to the neighborhoods. Jim Wasilak responded that previously there had been concerns about other uses, such as a parking lot on that site, but that he could not recall any opposition to the

recommendation in the Town Center Plan to rezone the property. He pointed out that the R-30 townhouse yield on the property was of a similar density to the adjacent Courthouse Walk community. Commissioner Ostell also asked whether the former homes on the property were historic, and Mr. Wasilak responded that they were included in the City's inventory of historic properties, and would require review by the Historic District Commission by virtue of their age as well.

Commissioner Ostell asked about the discussions taking place on the Town Center zones, and Mr. Wasilak answered that the Mayor and Council had concerns about the potential densities and height limitations for the TC zones. Another worksession with the Mayor and Council is necessary before that process moves forward. She also asked about whether the property owners on Hectic Hill Lane agreed with the rezoning, and Mr. Wasilak responded that he did not know because he had not received any calls. There would be another notice sent out prior to the Mayor and Council public hearing. Bob Spalding added that there is a private covenant on the properties that restricts the minimum lot sizes to two acres.

Commissioner Ostell also asked about the two properties that were subject to the moratorium that led to the compatibility text amendment - 22 West Jefferson Street and the former car dealer site on Rockville Pike. Mr. Wasilak responded that 22 West Jefferson was subject to the rezoning (from O-1 to O-2), but that the car dealer would remain in the RPC Zone. Bob Spalding added that the applicant for the 22 West Jefferson Use Permit had amended their submission. The new plan meets the new transitional setbacks and height limitations, but would not meet the lot coverage requirement in the O-2 Zone.

The Commission voted unanimously to recommend approval of Map Amendment application MAP2004-00091 to the Mayor and Council.

/rjw

**CITY OF ROCKVILLE LONG RANGE PLANNING DIVISION
STAFF REPORT**

October 27, 2004

SUBJECT:

Map Amendment Application MAP2004-00091

Applicant: Mayor and Council of Rockville
111 Maryland Avenue
Rockville, Maryland 20850

Planning Commission Review Date: October 27, 2004
Mayor and Council Public Hearing: December 6, 2004

REQUEST:

This application is a Sectional Map Amendment that is intended to rezone portions of the Town Center Planning Area based on the recommendations in the Town Center Master Plan. Sectional Map Amendments are defined by Section 25-116 of the Zoning Ordinance as covering a section of the City, portions of which may be classified in different zones.

BACKGROUND:

The Mayor and Council adopted the Town Center Master Plan on October 22, 2001. Within that document, several recommended changes to the Zoning Map were included in order for the Plan's recommendations to be realized. The processing and adoption of a Map Amendment application to change the zones will implement these recommendations.

DISCUSSION:

The Map Amendment as proposed would accomplish the renaming of the Town Center zones from TCO-1, TCO-2, TCM-1 and TCM-2 to TC-1, TC-2, TC-3 and TC-4 respectively, which was a recommendation of the Town Center Master Plan. Note that any zoning changes east of the Metro/CSX tracks will be brought forward via the zoning recommendations contained in the East Rockville and Lincoln Park Neighborhood Plans.

Approximately 12.66 acres will be rezoned from the TCO-1 Zone to the TC-1 Zone, and are located generally along the west side of North Washington Street between Jefferson Street and Martins Lane. Approximately 14.55 acres along the east side of Hungerford Drive between Baltimore Road and the Archstone development will be rezoned from the TCO-2 Zone to the TC-2 Zone. Approximately 26.45 acres near the Rockville Metro station will be rezoned from the TCM-2 Zone to the TC-4 Zone, while approximately 25.73 acres will be zoned from the TCM-1 Zone to the TC-3 Zone. It should be noted that, given the new property boundaries and

street rights-of-way that have recently been created as a result of the Town Square project, staff recommends that the zone boundary follow Maryland Avenue extended. Property to the west of Maryland Avenue will be located in the TC-3 Zone rather than being split-zoned, a situation that should be avoided where possible. This will result in a reduction in the amount of land in the TC-4 Zone compared to what had been in the TCM-2 Zone.

In addition to the renaming, several properties will be rezoned to different zones. These include rezoning 10.42 acres, generally along the west side of North Washington Street and Hungerford Drive between Martins Lane and Ivy League Lane, from the C-2 to TC-1 Zone. The west side of the Rockville Metro station is proposed to be rezoned from the TCO-2 Zone to the TC-4 Zone.

The following is a discussion of specific sites to be rezoned:

Fleet Street properties

The Town Center Master Plan recommended that the property located on the south side of Fleet Street, between Maryland Avenue and Monroe Street, be rezoned from the R-90 (One Family Detached, Restricted Residential) to the R-30 (Multiple Family, Low Density Residential) Zone. This would allow construction of townhouses or low-density multifamily structures on the site per the land use recommendations of the Plan.

The property is currently owned by the Montgomery County government, and contains nine former residences that have been used by the County for office space or other needs. The County has begun the disposition process, and the Housing Opportunities Commission (HOC) has expressed interest in developing residential units in the R-30 Zone. Given the surrounding uses, including City Hall and the County Council Office Building parking garage and the Emergency Communications Center, use of the property as single-family detached homes is not desirable. However, because of nearby single-family homes further south on Monroe Street, and the adjacent Courthouse Walk townhouse community, townhouse or low-density multifamily dwellings would make an appropriate transitional use between the non-residential and residential uses that surround the property. It should be noted that an unimproved 55-foot-wide right-of-way for Mt. Vernon Place separates this property from the Courthouse Walk community, providing an opportunity for a substantive buffer between that community and any new development on the property should it occur.

Jerusalem Mt. Pleasant Church properties

The church itself is listed in the National Register of Historic Places, and the church and adjacent parsonage are within the West Montgomery Avenue Historic District. However, the church building is located in the R-60 Zone, while the parsonage and former shelter are located in the TCO-1 Zone. The remainder of church-owned property is in the O-2 Zone and fronts on Beall Avenue. These parcels are contiguous, yet are in three separate zones.

The Town Center Master Plan recommended that the Jerusalem Mt. Pleasant Church property be rezoned to the O-2 Zone in order to remove the condition that church property is within three zones. Unfortunately, the text amendment that created the C-T Zone also prohibited subdivision for the purpose of assembling properties for redevelopment. The accompanying Text Amendment includes language that would exempt properties like the existing Jerusalem Church properties from this restriction, provided that the assembled land is limited in size to 40,000 square feet total. In order to simplify any future site improvements to the property, the Town Center Master Plan recommends that all of the parcels be zoned O-2.

39 West Montgomery Avenue

In the Comprehensive Map Amendment that was approved in August 2003, a total of 21 properties were rezoned from the O-2 Zone to the C-T (Commercial Transition) Zone. These properties meet the intent of the new zone, which is meant to apply to those existing structures that were formerly single family residences and have been converted to office use through previous implementation of the O-2 Zone. The purpose of the C-T Zone is to distinguish these properties from other office structures that were built for office use under the O-2 development standards, and that will remain in the O-2 Zone.

39 West Montgomery Avenue was considered for rezoning at the time of the Comprehensive Map Amendment, but was removed from consideration due to comment from the property owner that the C-T Zone would be restrictive on future use and potential additional development of the site. The property was removed from the map amendment in order to allow the owner to consider options, and staff discussions indicate that the owner is considering developing a second lot. Staff therefore recommends that the property be included for rezoning to C-T, with the possibility that adjustments may be made in the future to allow the portion of the property that contains the Anderson House to be rezoned to the C-T, with the remainder beaming zoned O-2.

107 South Washington Street

In order to accommodate the expansion plans of the Christ Episcopal School, the rectory property is recommended for rezoning to the R-90 Zone. A portion of the current school crosses the zone boundary, and this would allow the school to be in the R-90 Zone. Although the rectory property was rezoned from the O-2 Zone to the C-T Zone last year as part of the Comprehensive Map Amendment, this action should have no practical effect on the rectory use.

Notification

Notification is required for the public hearing of a sectional map amendment. In addition, letters were sent to all property owners that own property where zoning is recommended for change. In addition, affected civic associations were notified by letter.

Recommendation

The majority of properties will not be affected by the zoning changes, as the new zoning is just a renaming will essentially confirm the existing zoning. For those properties that are changing, those changes were considered as part of public policy discussions of either the Town Center Master Plan or Text Amendment. Staff therefore recommends approval of the application as submitted, for the reasons noted above.

North Maryland Avenue	Mayor and Council of Rockville	03444717	GR32, Lot P38	TCM-2	TC-4	8,623 SF
Properties to be rezoned from C-T to R-90						
107 South Washington Street	Vestry of Prince George's Parish in Montgomery County	00157322	City Center Block B, Outlot A	TCM-2	TC-4	13,300 SF
			Original Town of Rockville, Block 2, Lot P6	C-T	R-90	13,300 SF

The following is a list of recommended zoning changes:

1. A change in zoning of the west side of the Metro station property from TCO-2 (FAR of 2.0) to TC-4 (FAR of 4.0) increasing the maximum permitted density to take advantage of the transit opportunities at the site.
2. A change in zoning of the east side of the Metro station property from I-1 (FAR of .75) to TC-3 (FAR of 3) and the institution of a Residential Proximity Slope influencing this property as illustrated in the diagram below.
3. A change in zoning of properties on the west side of Washington Street between Jefferson Street and Wood Lane from TCO-1 (FAR of 1.0) to the new TC-1 zone which would not change the density of the properties but would allow greater flexibility in uses.
4. A change in zoning of properties on the west side of North Washington Street and MD 355
5. A change in zoning of properties on the east side of MD 355 north of Park Road from TCO-2 (FAR of 2.0) to TC-2 (FAR of 2.0) to allow for greater flexibility of uses.
6. A potential future change in zoning of properties to the west of North Stonestreet Avenue between Park Road and Lincoln Avenue and to the east of North Stonestreet Avenue between Park Road and Howard Avenue from I-1 (FAR of .75) to TC-1 (FAR of 1.0) to allow for residential and low-density office uses. (Note: Any Zoning changes for property in the Planning Area abutting North Stonestreet Avenue would occur in the context of a Neighborhood Plan for the area.)
7. A change in zoning of property at the southwest corner of Fleet Street and Monroe

A residential proximity slope should be utilized at the Metro station to protect adjacent residences.

Street from R-90 to R-30, or to a new zone that would allow for an appropriate scale of single-family attached or multifamily development.

8. A change in the optional method of development for property north of Beall Avenue and east of Maryland Avenue extended from TCM-1 (FAR of 3.0) to TC-4 (FAR of 4.0) if provisions for proposed public street extension projects are made. Otherwise, properties would be subject to the TC-3 (currently named TCM-1) standards.
9. A change in the optional method of development for property north of Dawson Avenue between North Washington Street and MD 355 from TCM-1 (FAR of 3.0) to TC-4 (FAR of 4.0) if provisions for proposed public street extension projects are made. Otherwise, properties would be subject to the TC-3 (currently named TCM-1) standards.
10. A requirement for ground floor retail uses in properties that front Maryland Avenue; the resulting ground floor retail space would not be included in the FAR calculations and maximum heights would be measured starting from the second floor or 16 feet above the street level, whichever is lower.
11. Allowance of surface parking (except on Maryland Avenue) as long as the lots are screened and no larger than 50,000 square feet.
12. Creation of an Urban Design Overlay District (see map on page 91) within which the *Design Guidelines* recommendations described below would be applicable.
13. A change in the maximum height limit to 110 feet for buildings built prior to July 1, 2001 in the TC-2 Zone, immediately south of Church Street and east of MD 355.
14. Allowing freestanding restaurants in the TC-1 Zone as a permitted use along North Washington Street. Drive-through restaurants shall not be allowed. To encourage restaurants to locate in the proposed restaurant district, flexible parking regulations should be developed to allow for parking reductions when valet or other public or private off-site parking is provided.

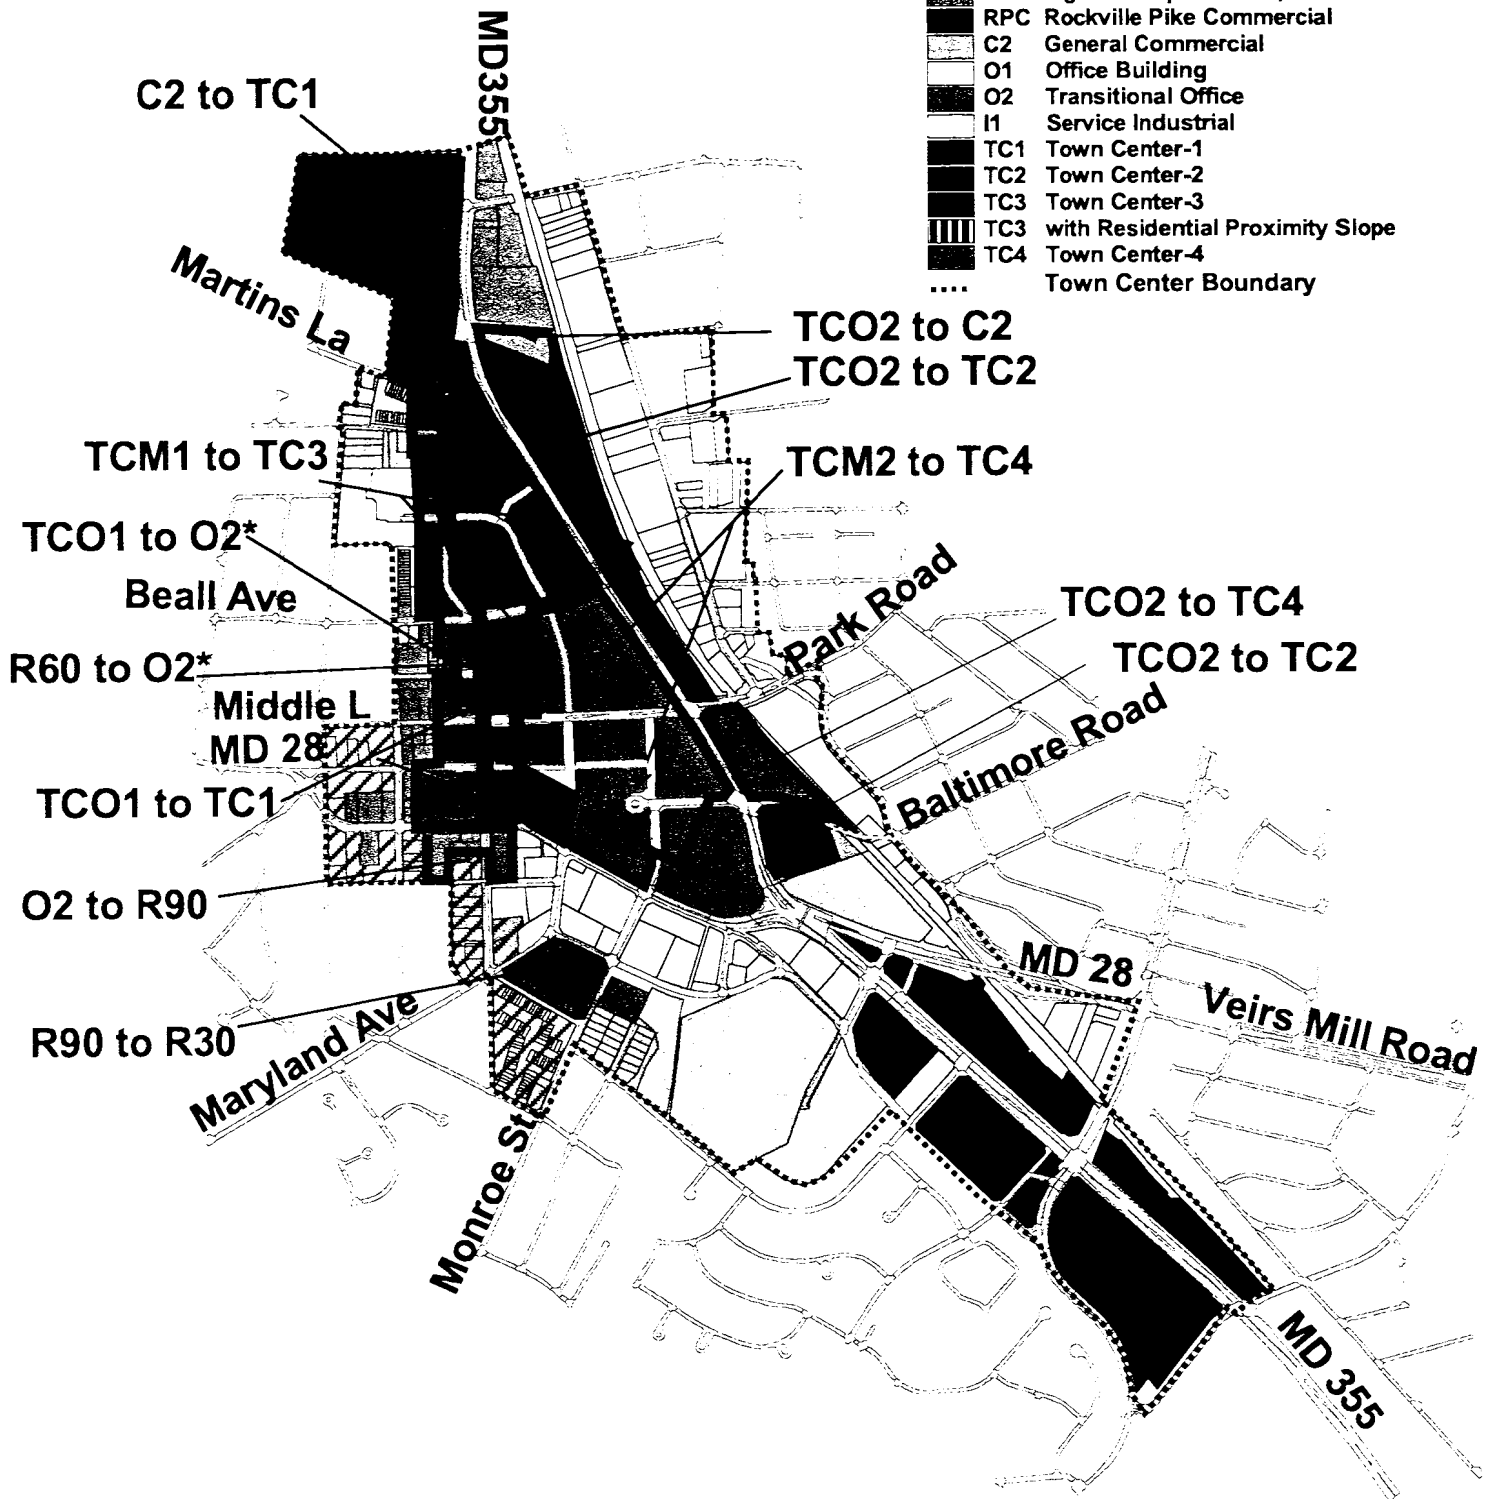

These changes are shown on the *Proposed Zoning* map following page 88. No existing zoning requirements other than those described above would change. The Master Plan proposes these changes but recommends that City staff, in conjunction with property owners, evaluate these proposals further.

Design Guidelines Recommendations

The Master Plan recommends the creation of Design Guidelines for use in an Urban Design Overlay District (see map on page 91). The boundary of this district corresponds with the desired urban areas within the Town Center Planning Area. The creation of such standards will help to ensure that the design of new Town Center development meets the *Goal and Objectives* of the Master Plan.

The Town Center Planning Area includes areas at its periphery that are not always identified as being within the urban core of the Town Center. The guidelines would not apply to those areas. In addition, some areas in the Planning Area deserve further study as part of a neighborhood planning effort incorporating other areas beyond the Town Center Planning Area boundaries. The creation of any design standards for those areas should be done in conjunction with those neighborhood planning efforts.

The recommended Design Guidelines for the Town Center are based upon the *Desired Framework* and the goal of reinforcing the East

Note:

The map does not reflect zoning changes to C-T made as part of the Citywide Master Plan, Map Amendment, 8/4/03.

* Jerusalem Church property
